**Summary:**

**My invention allows women to privately nurse in public, with great convenience.**

---

September 11/98

**To whom it may concern:**

I would like to Patent my Invention.

My invention is called the "Nursing Buddy" it is a nursing mothers dream. It is a cloak like cover, that covers baby while mother is nursing in public. It gives mother privacy, while protecting baby from any food or liquid, yet the mother can still have full view of baby through the plastic window, so if the baby needs help, the mother can see, and give help. If mother needs privacy, she can close the window with a flap. The cloak is securely fastened around the mothers neck with a Velcro strap, to prevent from falling, and there are 3 weights in the bottom of the cloak to weigh fabric down and keep away from baby's face, so it won't interfere with nursing. The fabric is vinyl or nylon so it can be easily wiped clean, and it is also cool. It comes in different colors and patterns. When not in use, it folds away and stores easily in diaper bag.

Sincerely: Tanya Iverson
